

WORLD SUPPLY

World Supply Co., Ltd. General Information

All About World Supply

We will create new value in business through innovative logistics solutions

World Supply Co., Ltd. is a member of SG Holdings Group, consisting of several businesses including Sagawa Express Co., Ltd.

We have offered many types of services such as “third-party logistics (3PL)” mainly for imported cosmetics and apparel, as well as “joint food delivery,” focusing primarily on “retail support operations” to major department stores all around Japan by utilizing the nationwide network of Sagawa Express to the greatest extent possible.

Our wide range of services leveraging our wealth of experience has earned the high evaluations of clients.

Going forward, we will continue to create new value in business with logistics solutions that meet client needs through the provision of even higher-quality services in our existing operations and through the promotion of information provision using cutting-edge IT technology.

Creating new value for your business with revolutionary logistics solutions.

Retail Support

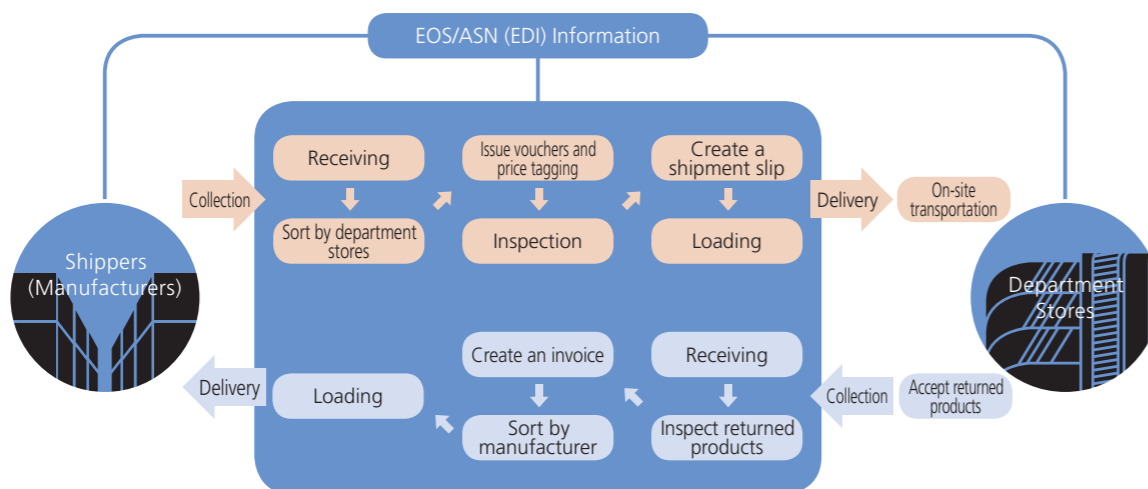

“World Supply Known for F Kenpin Package and Time Quality”

Retail Support Operations

Delivery agency refers to the transportation operations involved in the collection of products by the designated shipping operator (i.e. World Supply) of retail businesses (mainly department stores) directly from the manufacturer until delivery of the products. Inspection agency refers to conducting inspection on behalf of department stores—to check whether products have been shipped in accordance with the orders made by department stores when the manufacturer delivers their own company's products to the department stores—in transactions between manufacturers and department stores (i.e. checking the product numbers, quantity and amount of money of products), and thereby making it possible for department stores to recognize the purchases.

We significantly shorten the lead-time until products are supplied to department stores through inspection at any time at our inspection center, which runs 24 hours a day, as well as through direct delivery to the stores without going through the conventional department store centers. We enhance our logistics support within department stores in order to reinforce our support of sales.

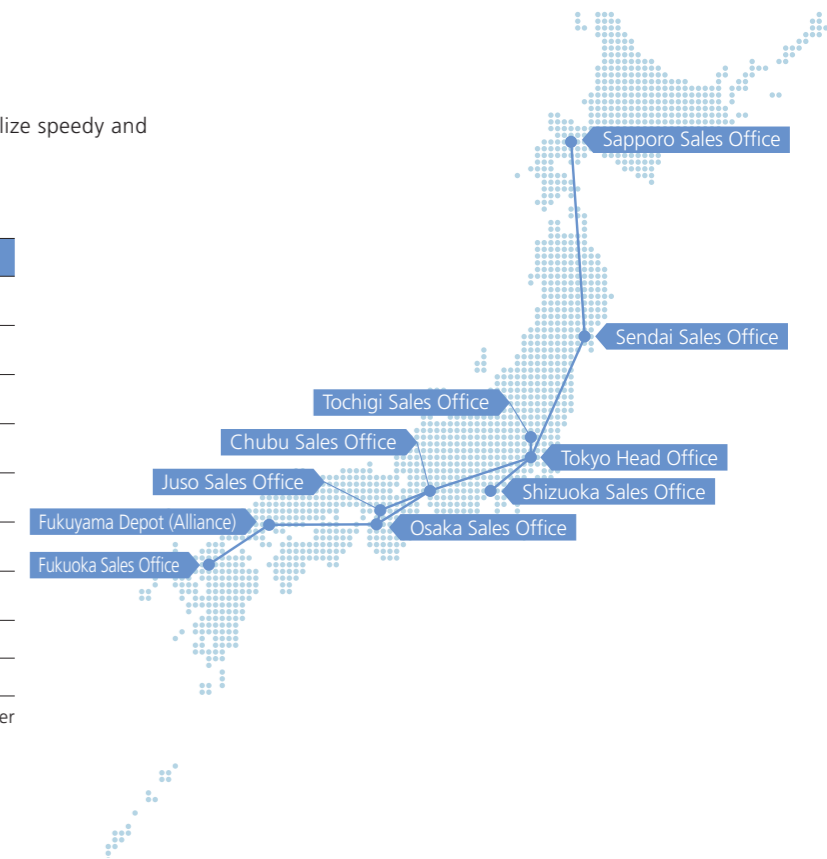

Nationwide Network

Our sales offices are located primarily in major cities. We realize speedy and reliable shipments leveraging our nationwide networks.

[Standard lead time]

Destination	From Kanto	From Kansai
Hokkaido	2 days, before opening time	3 days, before opening time
Tohoku	Next day, before opening time	2 days, before opening time
Kanto	Next day, before opening time	Next day, PM
Shizuoka	Next day, before opening time	2 days, before opening time
Chubu	Next day, before opening time	Next day, before opening time
Kansai	Next day, before opening time	Next day, before opening time
Chugoku	Next day, PM	Next day, before opening time
Shikoku	Next day, PM	Next day, AM
Kyushu	2 days, AM	Next day, PM

※Depending on the delivery destination, the actual lead time may differ from the above lead times.

Retail Support

Delivery

We deliver products picked up from manufacturers as well as products that have arrived from each of our sales offices located all around Japan to department stores and commercial facilities.

Returned products

We deliver the products returned from stores to the manufacturer's logistics center, factory, etc.

Transfer between Stores

We deliver client-ordered products and stock transfer products between stores.

Inspection

We inspect on behalf of department stores whether products have been shipped according to the order placement data.

Facility transportation

We deliver the products directly to the sales floor after the products arrive to the department stores.

Charter

We charter a private truck based on request from clients for large-sized shipments.

Price tagging

We conduct the issuing and attachment work of price tags on behalf of our clients.

Using Sagawa Express

We coordinate nationwide shipping by using the shipping infrastructure of Sagawa Express.

Special Events

We deliver products to the locations of special events and occasions held inside and outside stores.

Retail Support

“World Supply for Total Inspection Services”

F Kenpin Package

(Kenpin:Checking the product numbers, quantity and amount of money of products)

This is a service that helps make smoother the commercial transactions between retailers and manufacturers. We conduct retail support operations for each retailer on a common platform, so that retailers only need to provide their order placement information and their burden from troublesome work will be reduced. Through this service and the use of a warehouse management system and virtual backyard space, we handle the rush shipments of best-selling products and automatic replenishment of standard products, and we also realize same-day delivery.

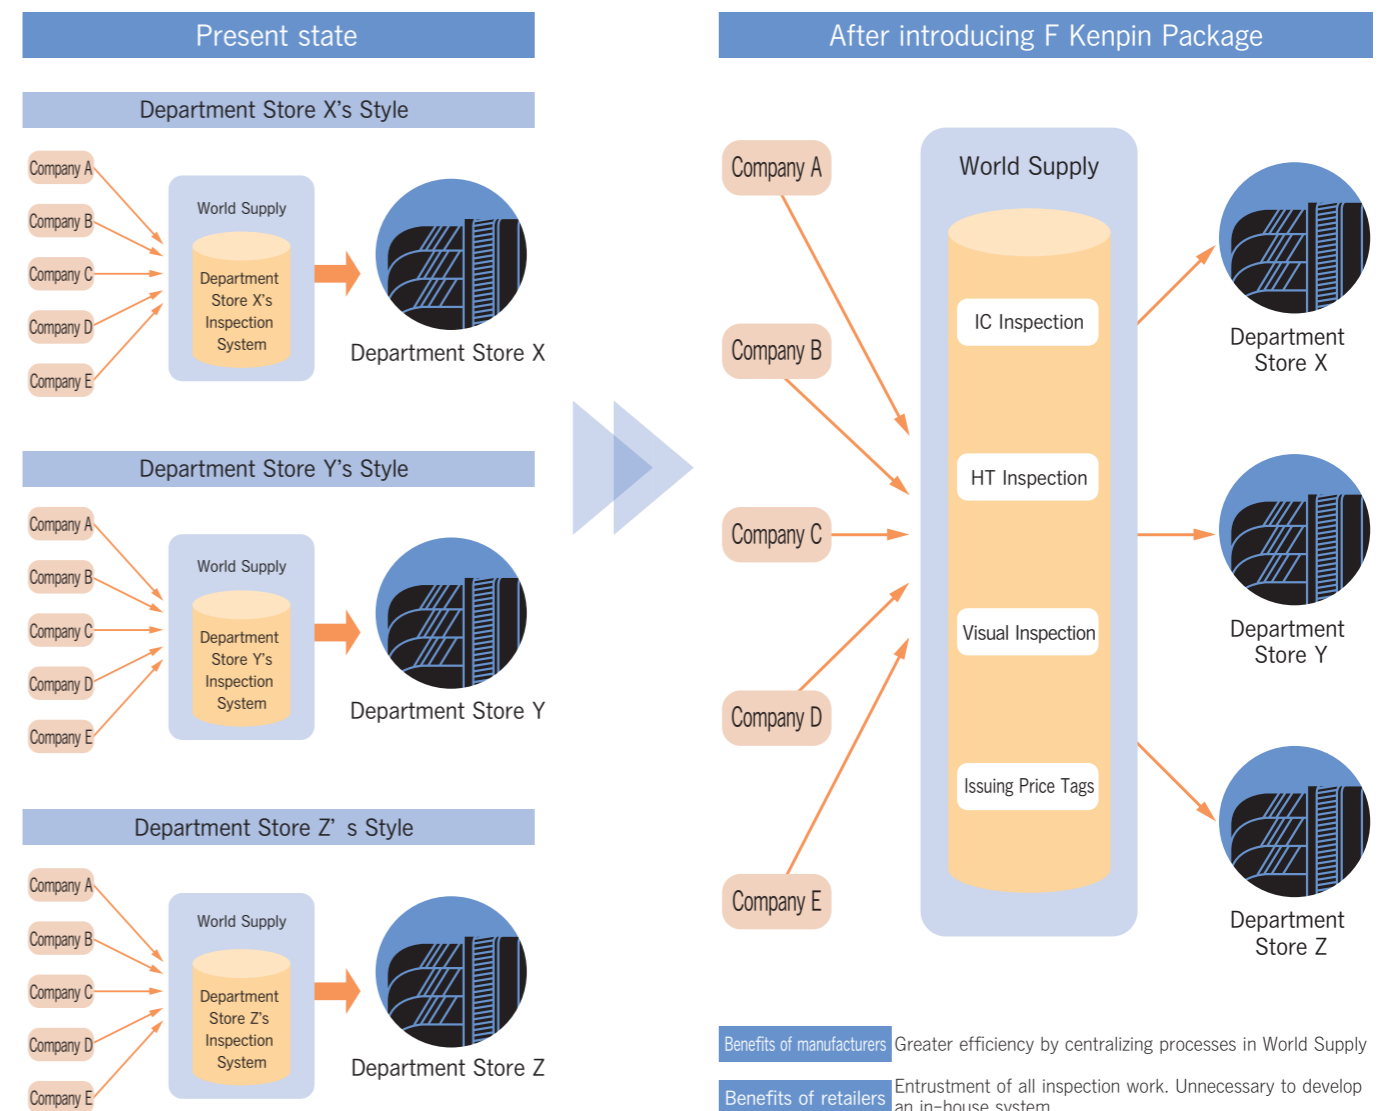

Service Characteristics

- 1 Provide a package function of commercial transactions between retailers and manufacturers (such as registration of product catalogue, product proposal/approval of orders to placement of orders, receipt of products, etc.). We will realize a commercial transaction that complies with distribution BMS in a short period of time.
- 2 Due to the order data of retailers and inspection operations by F Kenpin Package, retailers can track our company's cargo with their order numbers. Furthermore, retailers can acquire the data of delivery information after inspection is finalized from our company's cargo tracking screen, and this will accelerate the settlement of sales to clients.
- 3 The retail support operations we conduct for each retailer on a common platform will reduce the burden of troublesome system maintenance work, such as inspection system maintenance, line monitoring and incident response unique to retailers, and retailers will only need to provide order information.
- 4 We not only provide services for the issuing of retailer price tags, SCM inspection agency, product catalog/order placement data creation agency, but also for multi-tag (label) handling such as bulk inspection with IC tag and the issuance of IC tags.
- 5 Through F Kenpin Package and the use of an inventory management system (WMS) as well as virtual backyard space, we handle the rush shipments of best-selling products and automatic replenishment of standard products, and we also realize same-day delivery.

Benefits of Using Our Services

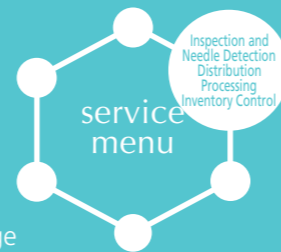

Logistics

“World Supply Known for Stock Yard”

Logistics Operations

We specialize in unique ancillary tasks. For imported cosmetics, we are able to manage manufacturing tasks (management of various slips; manufacturing process), as well as product storage, distribution processing and shipment work, in addition to the process from works in progress to production. For apparel, we carry out QC operations (product testing, sewing) and services that cannot be found at other companies.

We are capable of distribution processing, specializing in imported cosmetic products.

At World Supply, we have acquired a manufacturing license for cosmetics and nonmedicinal products, so we are able to undertake operations such as labelling, packaging and storage of cosmetic products and nonmedicinal products. You can rest assured in entrusting your work to us.

Our Locations

In addition to our sales offices and logistics centers located in major cities all across Japan, we will propose logistics facilities that match our client's needs.

Ariake No. 1 ABC Center
(Ariake, Koto-ku, Tokyo)

Ariake No. 3 ABC Center
(Ariake, Koto-ku, Tokyo)

Kawasaki Center
(Higashiogishima, Kawasaki-ku,
Kawasaki-shi, Kanagawa)

Osaka Sales Office
(Shibatani, Suminoe-ku,
Osaka-shi, Osaka)

Delivery	¥45	piece
Return	¥60	piece
Create tags	¥15	sheet
Attach tags	¥35	sheet
Devanning	¥1,000	feet

※The work rates vary depending on various conditions, such as operation procedures, amount of cargo, the length of contract with the client, and more, so please request for a quotation each time.

Retail Support/Shipping of Perishable Foods

“World Supply Known for Quick Delivery of Foodstuff”

Foodstuff Operations

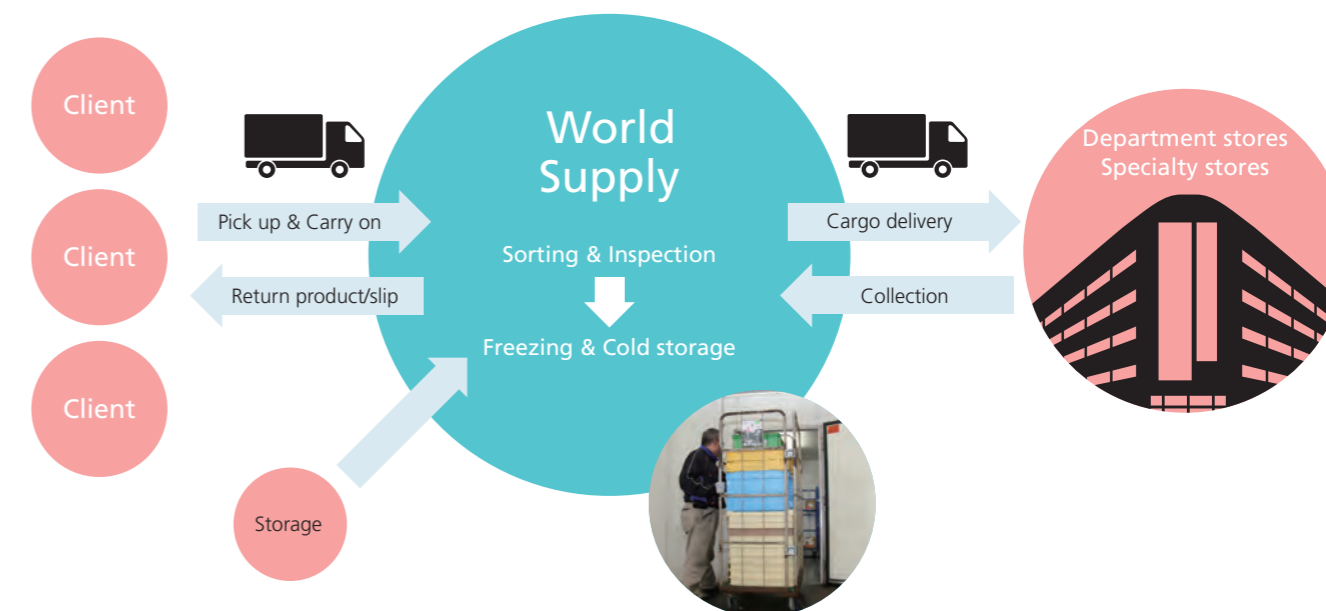

In 1983, we began to provide small-sized shipments within the 23 wards of Tokyo for union members of the Wholesales Co-operative of Tokyo Fish Market. Currently, these members deliver the fresh foodstuff purchased at the Tsukiji Market to retailers, sushi restaurants, supermarkets and more within Tokyo by using our company's joint shipping service of perishable foods. We also deliver products that have been purchased outside of the market such as fruits, vegetables and dried food. Through the effective collection and delivery system of this joint shipping service of perishable foods, we are contributing to the reduction of logistics costs as well as the alleviation of traffic congestion around the market.

Joint Distribution of Perishable Products

Foodstuff Retail Support

We also provide retail support for fixed-temperature products such as Japanese and Western confections, household dishes, wine, and more. We carry out thorough temperature control by using refrigerator trucks and refrigerator storages so that our clients can sell their products to end users with peace of mind. We also handle the storage and shipment operations of processed food, and we provide a speedy and low-cost logistics service through integrated logistics.

Foodstuff Services

We offer services to help you deliver your foodstuff safely.

Inspection	Freezing & Cold Storage	Charter
We inspect whether products have been shipped according to the order data on behalf of department stores.	We store the products that we receive from our clients at the proper temperature.	Frozen and refrigerated trucks can be chartered for rush shipments, large-sized shipments, etc.
Special Events	Immediate Delivery (Joint Distribution of Perishable Products)	Inside Collection (Joint Distribution of Perishable Products)
We deliver products to the event venues of department stores, such as product exhibitions, at the designated time.	We offer same-day delivery jointly with Sagawa Express not only within the 23 wards of Tokyo but to other areas as well.	Our company's driver will go inside the market to collect the products.

Example of Rates (Joint Distribution of Perishable Products) ※ Excluding tax

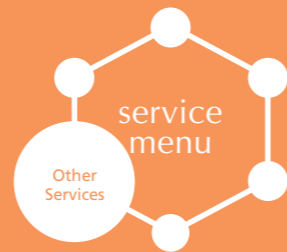

23 wards of Tokyo	1 parcel	2 parcels	3 parcels	4 parcels	5 parcels
Small (up to 10kg)	¥500	¥1,000	¥1,500	¥2,000	¥2,500

Large (up to 30kg)	¥1,100 yen	¥2,200	¥3,300	¥4,400	¥5,500

Facility Logistics Support/Other

“World Supply Increases Facility Value”

Facility Logistics Support

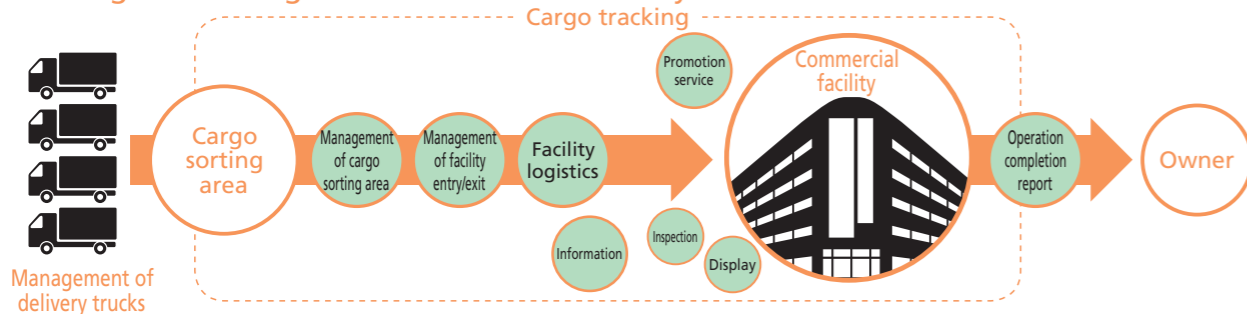

There are many issues surrounding logistics that are encountered in the management of large-sized commercial facilities and complexes. For example, there is concern of traffic congestion in the area surrounding the facilities due to trucks waiting for delivery as well as the resulting impact on the environment. The manners and service of delivery staffs may be out of place for facilities that have high standards of hospitality. Furthermore, managing the security for the entry of delivery operators may be difficult. We propose World Supply's “FLS Package” as a means to solve these issues.

Facility logistics in the past(only the intermediation of home delivery parcels)

New logistics management of the entire facility

6 Benefits of FLS Package

1
Management and reporting of logistics information within the facility

We manage all information of delivery cargos and delivery trucks and put it into a database. This data is provided to clients on a monthly and yearly basis as an operation completion report.

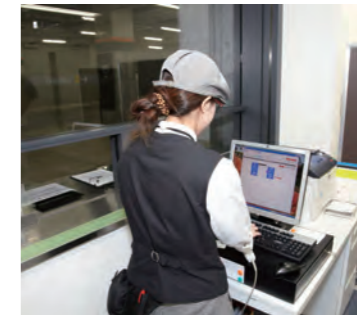

2
Promotion of a smooth logistics

We provide quick and high-quality shipping agency service by centrally managing the home delivery cargo, and we also implement other tenant services. By centralizing client support in one place, we are able to respond to all inquiries related to logistics.

3
Neighborhood environment & alleviation of traffic congestion

We efficiently manage the entry/exit of delivery trucks to the cargo sorting parking area. By doing so, we contribute to the alleviation of traffic congestion in the neighborhood and the reduction of CO₂ emissions.

4
Security management

We strictly control the entry/exit by delivery trucks and delivery operators. We strive to maintain the safety of the facility with a rigorous security system.

5
Protection of on-site facilities

We are constantly keeping alert to protect the facility and maintain its beautiful appearance such as by ensuring that delivery is done by using trolley carts. This also leads to saving cleaning and repair costs within the facility.

6
Implementation of a cutting-edge system

We have realized electronic acceptance, which does not use delivery slips. This is a service consisting of multiple functions including floor guidance to facility visitors.

FLS Package

We offer services that match your needs.

Inspection and product management operations

We carry out the product inspection and stock yard management of tenants.

Display

We carry out the product display on behalf of tenants.

Facility logistics

We carry out delivery agency operations within the facility by centrally managing the home delivery parcel cargo.

Management of cargo sorting parking area

We prevent congestion in the cargo sorting area by enforcing facility entry control of delivery trucks by registration and schedule management of delivery times.

Facility protection(trolley cart)

We create a rule to use trolley carts when delivering inside facilities.
※We rent out trolley carts to delivery operators

Facility protection(covering)

When delivering large-sized cargo and fixtures as well as during relocation of tenants, we manage the entry/exit of deliveries and create a rule to use protective covering materials.
※We manage the applications submitted in advance

Management of facility entry/exit

We manage the facility entry/exit of delivery operators and delivery trucks.
※We issue usage permits of the cargo sorting area

Operation completion report

We manage information of the delivery cargo, delivery trucks and delivery operators. We create a database of the information and provide it on a monthly and yearly basis to clients as an operation completion report.

Bulk delivery of products before opening

We carry out operations ranging from the setup of a bulk delivery secretariat to the formulation of a delivery plan as well as the control of delivery trucks all at once.

Responsibility of Service Fees

Other

Information Services

At World Supply, we also support our clients in terms of systems. We have a system that is suitable for each client who uses our delivery services, FLS, logistics, etc. By using these systems, we can improve operation efficiency and contribute to the reduction of client work load. We look forward to your business.

System for Retail Support

We have a convenient system for clients that use our retail support. We offer the systems shown below free of charge.

Online cargo tracking system

- You can check the delivery status of your shipment on your computer.
 - You can search the delivery status based on the "name of the department store" or "invoice/shipping number"!
 - It has enhanced search functions from ambiguous information like the designation of delivery period.
- The system can be used simply by entering the ID and password notified by World Supply after registration.
• Use of the system requires a computer that is connected to the Internet.

★ Cost **Free of charge** (requires Internet connection)

Price tag issuing system

- By using data such as of shipment information, you can issue a price tag for major department stores.
- The layout of the issuing information is not specified.
- The system will keep a record of issued price tags, so we can respond immediately to your inquiries.
- Any price tag can be issued as long as the layout can be downloaded from Sato Holdings Corporation's website!

★ Cost **Free of charge** ※Separate estimates for issuing special price tags

Online tag issuing system

- Invoices can be issued by importing existing shipment data.
- This saves the time required for filling out invoices and it can significantly improve work efficiency at the shipment site.

★ Cost **Free of charge** (requires Internet connection)

FLS Package System (for department stores and large-sized commercial facilities)

Central management of information of "people, things and trucks" inside the facility! We provide the accumulated information as an important database for facility management.

★ Cost Starting from 50,000 yen/month (requires Internet connection)

- Tracking cargo within facilities from the cargo sorting area to the sales floor
- Truck management of delivery operators, calculation of parking fees and issuance of receipts
- Creation of reports for facility owners
- Other customization is also available

Warehouse Management System [STAR WMS] (for manufacturers and logistics warehouses)

Original warehouse management system equipped with operational know-how unique to World Supply!

★ Cost Please contact our sales representative.

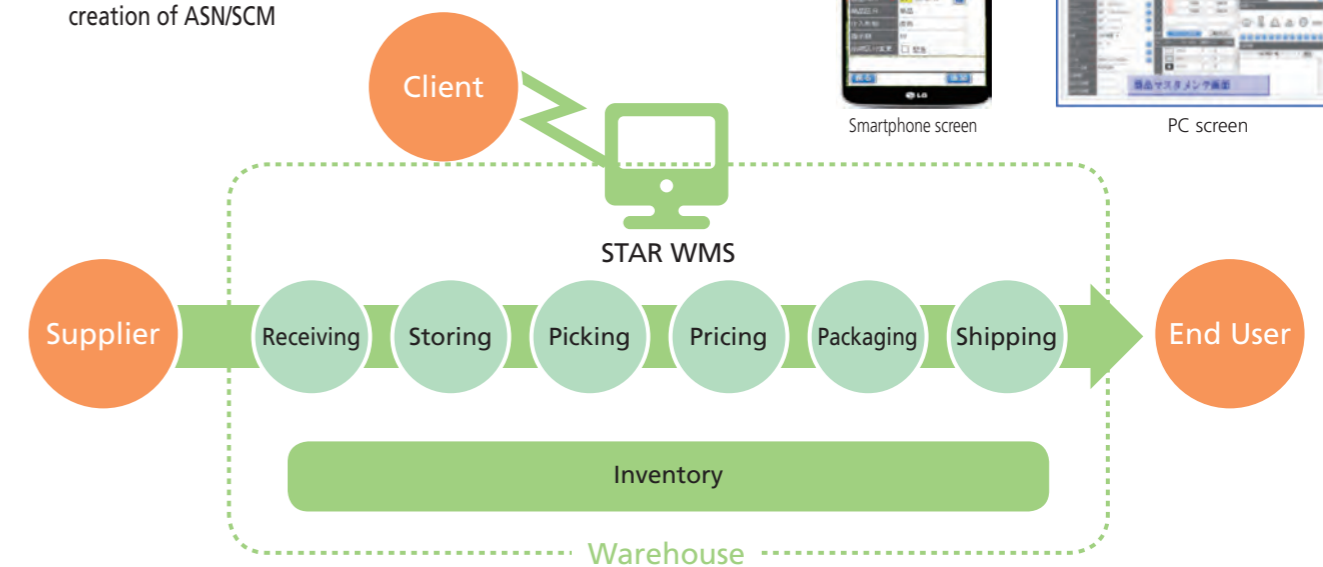

- The system is through web application, and it allows clients to use it from wherever they are as long as they are connected to the Internet.
- EC operations are also supported
- Standard equipment of everything from warehouse management to the creation of ASN/SCM

Smartphone screen

PC screen

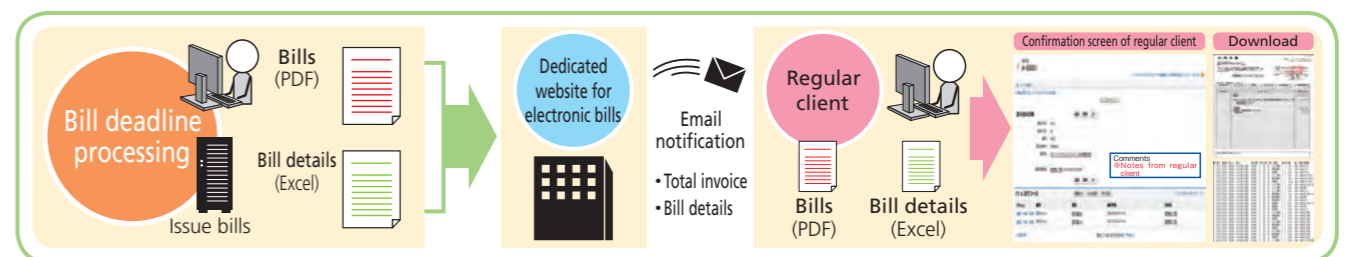

Electronic Bill Delivery Service

This is a service in which bills are delivered to a dedicated website for regular clients.

★ Free of charge Requires Internet connection.

- An informational email will be sent at the time of issuing the bill.
- This will speed up the delivery of bills by half day to one day compared to the past.
- Total invoice (PDF format) and bill details (Excel format) can be viewed and downloaded.
- A login ID and password will be issued to each regular client.
- ※The password can be changed by the regular customer.

Other

ABC Studio

ABC Studio is a photo studio that combines five studios and a stock space on the same 3,000m² surface. Based on the concept that “Superior creative work is created from comfortable spaces,” we have incorporated the ideas of various photographers and thoroughly pursued ease of use. ABC Studio therefore supports all kinds of photo shooting. It supports creative artists as a rental studio that leverages its advantages of being in an ideal location and having a warehouse structure.

Studio Service

We offer various services and facilities required for photo shooting.

Rental studio

There are 5 studios of different sizes on the same 3,000m² surface. Please choose the facilities and studio size according to your purpose.

Waiting room

A spacious waiting room is set up on the same floor as the studios. It can also be used as a make-up room.

Stock space

There is a stock space available for clients who need to shoot product photos over a long period of time. It is located on the same surface as the studios so preparation and other work can be done smoothly.

Delivery of products and equipment

Products and equipment can be delivered using the trucks of World Supply. (Separate fees apply)

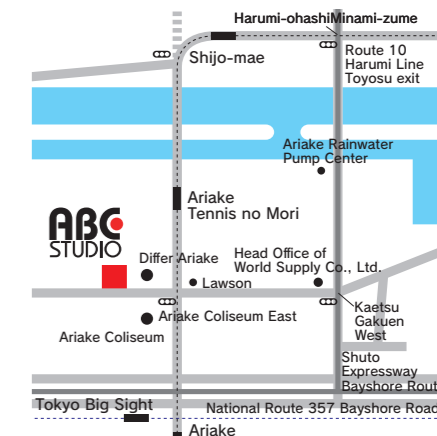

Rental equipment

Photographing equipment such as tungsten stands are also rented out. Please also contact us for equipment such as stands and curtains.

Rates Table ※Excluding tax
